DaokeReader

An APP of Beijing Zhike Online Technology Co., Ltd.

DaokeReader is a reading software for document library resources launched by Beijing Zhike Online Technology Co., Ltd. in 2016. Its trademarks "DAOKE READER" and "DaokeReader" were successfully registered in 2020, and the new product "Daoke Reader HD" was added in 2025. [5]

The software has a relatively small installation package size, consumes fewer system resources during operation, features fast startup and document opening speeds, and supports local reading and online retrieval of over 30 common document formats, including PDF, XPS, EPUB, and MOBI. The software has built-in document resources covering various fields such as academic literature, industry reports, and teaching courseware, and provides functions like online retrieval, document recommendations, and file format classification search. DaokeReader supports online reading, full-text copying, image copying, printing, and offline document reading, and offers services such as cloud-based group sharing, cloud notes, and block-encrypted storage. The software's operation mode is relatively simple, the reading interface can block advertisements, and it features annotation capabilities. Furthermore, DaokeReader has also released different versions adapted for mobile phones, tablets, and e-ink screen devices. [1]

Development History

Beijing Zhike Online Technology Co., Ltd. was established on July 29, 2015, and is the developer of DaokeReader. On April 11, 2019, a new software copyright was registered for "Daoke Reader Client HD Edition Software"; on October 25, 2019, a new software copyright was registered for "Daoke Reader Android Edition Software". On September 21, 2020, the trademark "DAOKE READER" was successfully registered; on November 28, 2020, the trademark "Daoke Reader" was successfully registered. [4]

In 2022, the “Docer Reader HD Tablet Edition”, specifically adapted for tablet devices, and the mobile version were released. On June 4, 2025, a new product, “Docer Reader HD”, was added. In 2026, the product was updated to version 2.12.74.0. [5]

Features

It can read documents in various formats including PDF, XDF, XPS, EPUB, MOBI, AZW/AZW3, TXT, CAJ, OFD, DJVU, CBZ, CBR, and CHM. It also enables users to search, read, and download online documents and materials, and offers functions such as full-text copying, image saving, one-click printing, cloud storage, and secure encryption. [1]

Core Technologies

DaokeReader utilizes big data computing and semantic analysis technologies to achieve online intelligent retrieval functionality. The system, through keyword matching and semantic analysis, intelligently analyzes the types of documents required by users and matches and recommends knowledge graphs with similar keywords. [7]

Regarding data sharing and storage, DaokeReader employs block-based encrypted storage technology to ensure the security and integrity of data shared within cloud-based groups, effectively protecting user privacy. [7]

Its built-in "File Format Classification Search" feature allows users to directly search for documents of a specific format without the need for format conversion. Meanwhile, for formats such as EPUB, eBook files can be opened instantly. [7]

Operating Model

DaokeReader is operated by Beijing Zhike Online Technology Co., Ltd. The company was established on July 29, 2015, with its legal representative being Zhao Yonggang and a registered capital of 1 million RMB. Its business scope includes technology development, technology transfer, technology consulting, technology services, and technology promotion; computer technology training; computer system services; basic software services; application software services; data processing; software development; and undertaking commissioned technical outsourcing services. [4]

DaokeReader has launched multiple versions for different devices, such as HD version, Android version, tablet version, e-ink version, mobile version, etc., and provides services like free reading and intelligent ad blocking to create an immersive reading environment. [6]
